NorFonts

End User License Agreement

Standard single-user license for NorFonts Font Software

Version 2.2 · 3 November 2026

This End User License Agreement ("EULA") is a legal agreement between you, either an individual or a single legal entity ("Licensee"), and NorFonts ("NorFonts", "NF" or "Licensor") for the font software and related files supplied to you by NF or an authorized reseller or agent (collectively, the "Font Software"). By downloading, installing, copying or using the Font Software, you agree to be bound by this EULA. If you do not agree to these terms, you may not install or use the Font Software.

For a Standard License, use of the Font Software is limited to one individual (the "Licensed User"). If the Licensee is a legal entity, the Licensee must designate one individual as the Licensed User. Any additional person who needs to install or use the Font Software must hold a separate valid license or be covered by a separate written Multi-User License issued by NF or an authorized reseller.

1. Font Software License

The Font Software is protected by copyright laws, international copyright treaties and other intellectual property laws and treaties. The Font Software is licensed, not sold. The license is non-exclusive and does not transfer ownership of the Font Software or any intellectual property rights in it.

Except where an applicable order, invoice, license certificate or written addendum expressly provides otherwise, this EULA grants rights only to the Licensee and the Licensed User and is subject to the limits set out below.

2. Grant of License

The Licensed User may install and use the Font Software on devices permitted under Section 3 and use it to create musical scores, graphics, documents, printed materials, digital images and other visual output on any surface or medium.

The Licensed User may use the Font Software for personal, educational, professional and commercial purposes. There is no restriction on the number of impressions, copies of finished output, items sold or total revenue associated with works created using the Font Software, provided that the Font Software itself is not redistributed or made available except as expressly permitted by this EULA.

3. Single-User Device and Backup Limits

A Standard License permits the Licensed User to install and use the Font Software on up to four (4) devices primarily used or controlled by that Licensed User.

The four-device allowance applies to one Licensed User and does not authorize use of the Font Software by four different users.

Installation on a network, server or shared storage location is permitted only where access to the Font Software is restricted to the Licensed User and does not enable any other person to install or use the Font Software.

The Licensee may make up to four (4) backup or archival copies of the Font Software, provided that all such copies remain under the Licensee's or Licensed User's control and are not used to increase the number of permitted users or installations.

© 2018–2026 NorFonts · Proposed EULA v2.2

If more than one person needs to install or use the Font Software, a Multi-User License is required. Please contact NF or an authorized reseller to discuss an appropriate licensing arrangement.

4. Third Parties

You may not provide, distribute, transfer, upload or otherwise make the Font Software accessible to any third party except as expressly permitted by Section 5 or by a separate written license or addendum.

The Licensed User may create works for a third party using the Font Software, but may not provide that third party with a copy of the Font Software. A third party that wishes to install or use the Font Software must obtain its own valid license unless that person is an Authorized User under a separate written NF Multi-User License.

5. Embedding and Document Sharing

You may embed the licensed Font Software in a document or file that you send to third parties when the embedding is intended to permit viewing and printing of the finished document and does not enable extraction or independent use of the Font Software.

You may share editable source documents, including notation files, with third parties; however, any recipient who needs to install or use the Font Software to view, edit or continue working with those documents must hold a valid license unless otherwise covered by a separate NF license.

Finished static output, including printed scores, PDF files, rasterized graphics, video images and other non-extractable visual output created lawfully under this EULA, may be distributed without additional NF licensing fees.

5A. Commercial Application Embedding and Software Distribution

A Standard License does not authorize application or software embedding. Prior written authorization under a separate Commercial Application & Software Embedding License is required to incorporate, package, make available or distribute reusable NorFonts Font Software or font resources in or with software products, desktop or mobile applications, plugins, games, devices, downloadable templates, web applications, or comparable digital services.

This restriction applies whether the assets take the form of OTF/TTF files or reusable converted resources, including SVG glyph collections, vector or bitmap glyph libraries, SMuFL metadata, XML mappings and other assets intended for repeated font-like rendering. It applies even where the original font file is not distributed or users cannot install the assets independently.

The permitted conversion of individual glyphs into outlines within finished musical scores, logos, illustrations, PDF documents and other finished creative works is not, by itself, application embedding. This restriction concerns reusable resources packaged or distributed for font-like software functionality.

A separate commercial agreement may specify the licensed font family, identified application, operating systems, distribution rights, technical conversion deliverables, fees, security restrictions and support obligations. No specific license fee, royalty arrangement or third-party technology compatibility is granted or promised under this Standard EULA.

Where a separately signed commercial application agreement expressly authorizes additional uses, that agreement prevails over conflicting restrictions in this EULA solely for those expressly authorized uses.

6. Modifications

You may convert characters or glyphs from the Font Software into outlines using graphics, drawing or notation software and modify those outlines for use in finished creative works permitted under Section 2.

© 2018–2026 NorFonts · Proposed EULA v2.2

You may not modify, adapt, translate, decompile, reverse engineer, rename, repackage or create derivative font software based on the licensed Font Software without NF's prior written consent. The redistribution of reusable converted glyph libraries for software use is governed by Section 5A.

7. Ownership and Copyright

All title, copyright and other intellectual property rights in and to the Font Software, related documentation and authorized copies are owned by NF and/or its licensors. You must treat the Font Software like any other copyrighted software.

Unauthorized copying, resale, sublicensing or redistribution of the Font Software is strictly prohibited.

8. Updates and Support

NF may from time to time provide maintenance updates, corrections or revised files. Unless expressly stated otherwise, updates supplied for a licensed Font Software product are governed by this EULA.

This EULA does not require NF or an authorized reseller to provide technical support, future versions, new font families or new products unless such services or products are included in the applicable order or license certificate.

9. No Warranties

To the maximum extent permitted by applicable law, the Font Software and any related documentation are provided "as is" without warranties of any kind, express or implied, including without limitation implied warranties of merchantability, fitness for a particular purpose and non-infringement. The entire risk arising from the use or performance of the Font Software remains with the Licensee.

10. Limitation of Liability

To the maximum extent permitted by applicable law, NF and its authorized agents or resellers shall not be liable for indirect, incidental, special, consequential or similar damages, including loss of business profits, business interruption, loss of business information or other pecuniary loss arising from the use of, or inability to use, the Font Software, even if advised of the possibility of such damages.

Nothing in this EULA excludes or limits liability that cannot lawfully be excluded or limited.

11. Term and Termination

A perpetual Standard License remains in effect unless terminated under this Section or unless the applicable order expressly states that the license is time-limited.

Your rights under this EULA terminate automatically if you materially breach its terms and fail to cure the breach where a cure is reasonably possible. Upon termination, you must stop using and delete all copies of the Font Software in your possession or control. Lawfully created finished output may continue to be used and distributed.

12. Transfer

The license is personal to the Licensee and Licensed User and may not be transferred, assigned, sublicensed or resold without NF's prior written consent, except where applicable law requires otherwise.

13. Multi-User Licensing

A Standard License covers one Licensed User. Companies, publishers, music preparation businesses, studios, schools, universities and other organizations that require the Font Software for more than one user must obtain a separate written Multi-User License or License Certificate.

© 2018–2026 NorFonts · Proposed EULA v2.2

Multi-user licensing is handled case by case and may specify the number of Authorized Users, the licensed Font Software, installation or deployment rights, the license term and any other special terms. Please contact NF or an authorized reseller for multi-user licensing.

14. General Terms

If any provision of this EULA is held invalid or unenforceable, the remaining provisions will remain in effect to the fullest extent permitted by law. Failure to enforce a provision is not a waiver of that provision or of the right to enforce it later.

This EULA, together with any applicable order, invoice, license certificate and written addendum, constitutes the complete agreement concerning the Font Software and supersedes prior inconsistent licensing statements for the same transaction.

Existing licenses: this revision governs new licenses issued under this version and does not automatically revoke or reduce rights granted under an earlier license accepted before its effective date, unless the parties expressly agree otherwise.

15. Governing Law

The governing law and forum may be specified in the applicable order, license certificate or authorized reseller terms. If no governing law is expressly specified, the laws applicable at NF's principal place of business shall govern, without regard to conflict-of-laws rules, subject to any mandatory consumer or other protections that cannot lawfully be excluded.
