

Mezza Fonts for Sibelius

Congratulations on purchasing **Mezza Fonts for Sibelius!** These fonts are specifically designed for use in Sibelius and Finale versions up to Finale v26. For Finale v27 and later versions, please purchase the SMuFL version of the music fonts.

Installation

If Sibelius is running, quit it first.

Each music font package is compressed in a zip file. After decompressing the zip file, you'll find a parent folder containing 2 folders:

Font Installers

This folder contains the macOS and Windows music font installers. First, run the appropriate installer based on your operating system: (**.pkg** for macOS and **.exe** for Windows).

Sibelius Score Templates

Open the enclosed .sib files

[MezzaMM—SIBELIUS v7.sib](#) and [MezzaMM STD—SIBELIUS v7.sib](#) and navigate to:

Appearance > Export...

This action will export the house style for your future use. Save each library as: **MezzaMM** and **MezzaMM STD**

Now, you can import this house style into your existing Sibelius scores by going to:

Appearance > Import and selecting **MezzaMM** or **MezzaMM STD**
